# PATCH INSTALL

Before you attempt something, make sure your computer is set to Japanese encoding!

1. Copy the files from the Patch folder and paste them into your root re:connect folder.
2. Copy the files from the Video folder and paste them in the dx folder, located in your root re:connect folder.
3. Run game. Enjoy re:connect in English!

Users running the game on **Windows XP** will need to do an additional step. Please see the folder **For WinXP Users**.

If you want to revert back to the Japanese version, simply delete the patch files you copied into your root folder. Additionally, if you enjoy the game try and support the creators by buying an official copy of re:connect. See [here](#) for the available ways on how to do so.

For basic computing questions such as changing your locale to Japanese or locating your root folder, [see the FAQ here](#).

## Still having problems?

For further support please see the **DMMd re:connect English Patch thread** on Aarinfantasy

<http://aarinfantasy.com/forum/f16/>

# WARNING

This patch is for the fandisc **DRAMAtical Murder re:connect** and is not to be confused with the original game **DRAMAtical Murder**.

This patch assumes that the user already has the game **DRAMAtical Murder re:connect** installed and running on their computer.

In order for the patch to work correctly, you must start a new game for each route. In other words: do not load from pre-patch saves.

# 100% GUIDE

A character's good route (including both options) and bad route must be completed in order for their sprite to appear on the main screen.

You must clear all starter routes to unlock the last two special routes. These two new routes must also be completed for 100% completion.

You must beat all opponents in the card mini-game in order for all sprites to appear on the main screen and to achieve a true 100% of the game.
